

# Giant Stadium by JAF724

Thank you for downloading my track. However, I feel I must tell you that I borrowed many many things from other makers in order to make it. But unfortunately, I did not credit anybody in a readme file and I acknowledged no sources whatsoever. For example, look at these fine Freedom Hall and Louisville textures:

But you see, the Freedom Hall textures are from Mr. Destruction's Freedom Hall track. I think it's one of the best tracks ever made for MTM2. Have a look and see if you don't agree:

Naturally, I just couldn't resist including a little bit of Mr. Destruction's work in my own track. Scandalously, however, I didn't stop there. I did it a second time. Have a look at his Louisville track.

Sadly, I'm a cad and didn't even talk to him about using his work. I should be ashamed of myself, I really should. My work doesn't even compare to his. The truth is, I worship the track making ground Mr. Destruction walks on. We all should. In fact, I think you should download and drive Mr. Destruction's tracks instead of my own. That's the only way I can think to do justice to his work. He's a good guy who does great work, you won't be sorry. So, I urge you, go get his tracks and forget all about mine. Now that you all know what a scoundrel I am, I hope I can fly right from now on and do the right thing. In the meantime, check out Mr. Destruction's work so you can see all his fine models and art in all their originality.
